NakedWatch® Skeletons

NakedWatch® Malcomb - Rose Gold Skeleton

The NakedWatch® Malcomb - Rose Gold Skeleton was added to our line of Skeleton Watches in the summer of 2007. Having success with our popular Malcomb Skeleton with a stainless steel finish, it occurred to us that adding some color might be in order. The Rose Gold over black and stainless steel was the most compelling choice to bring vibrance and sophistication to our classic Malcomb Barrel Skeleton.

We are proud to add the Malcomb - Rose Gold Skeleton watch to our collection of industrial series timepieces. We are confident that this will become one of your favorite skeleton watches as soon as you put it on. Contact one of our authorized resellers or NakedWatch directly and inquire into adding a Macomb - Rose Gold Skeleton to your collection.
